

The Unzoo Sanctuary

**Giving Control & Competence Back to
Animals while Enriching Visitors**

**2023 Taipei Master Planning
and Zoo Design Conference
Jon Coe**

Zoo =
coerced animals, cages

Evolving to...

Unzoo =
Attracted Animals, Choice,
Control, Competence
No Cages!

Think Differently!

Zoo:

With “cages”
Physical barriers for animals

Display based upon coercion
or limitation

Managed captive animals

Animals forced to human
schedule

..

Large animal shows

Capital intensive

Unzoo:

Without “cages”
Physical barriers for people

Display based upon attraction,
motivation, choice & control

Managed free-ranging rehabilitated
and wild animals

People adapt to animal’s schedule
with animals trained to broaden
schedule

Small naturalistic Habitat Theatre.

Staff intensive

Zoos Evolving:

VICTORIAN EXHIBIT

- Humans dominate
- Cages
- Animals as objects

HAGENBECK EXHIBIT 1907

- Humans dominate
- Barriers “naturalistic”
- Zoo as model

IMMERSION EXHIBIT 1976

- Animals dominate
- Hidden barriers
- Nature as model

UNZOO 2004

- Animals & Nature Dominate
- Animals attracted rather than confined

Existing Unzoo Examples

People and birds exploit each other, creating vital and lasting bonds with 'nature'

These birds trained me to feed them

Existing Unzoo Examples

Dolphin swimming with people. Dolphin Controls the encounter.

Sea lions took over San Francisco's Pier 39, creating a tourist attraction.

Existing Unzoo Examples

Wildlife Connections

Over and Under

Tools of Change:

Exotic to Native Animals

- From exotic to native animals & habitats.
- From breed & release to heal & release.
- From many small expensive exhibits to fewer, larger mixed-species natural areas.
- From bring outside looking in: to walk-through experiences.
- From passive to guided experiences.
- From emphasis on built facilities to focus on staff & animal training and abilities.

Proposed restored site

Concept Plan

Byron Bay Wildlife Hospital & Sanctuary

Wildlife Hospital Concept

The Unzoo Sanctuary Case Study

Proposed Byron Bay Wildlife Hospital & Sanctuary

- Ecological restoration of a disturbed site.
- Wildlife hospital for rescue, treatment & release.
- Support some non-releasable wildlife in sanctuary.
- Connect to wildlife corridors.
- Condition local wildlife to accommodate visitors.
- Night experiences when wild mammals are active.
- Fewer visitors, “elite” experiences.
- Fewer buildings, more staff.
- Supporting events, conferences, retreats.
- Earned revenue to support hospital.

Strategic Concept: Will it work?

Based upon the novel proposition that visitors will be more satisfied discovering fewer **free-ranging** birds, mammals & reptiles trained to do natural behaviours, including semi-scripted “surprise encounters,” throughout restored natural landscapes compared to seeing more contained animals in a traditional zoo.

Tools of Change Summary

- Immersion Design
- Positive Training
- Habitat Theatre
- Control People – Attract Animals
- Provide Close Encounters
- Expand the Senses
- Night Encounters
- Ethnic Connections
- Invest in People, Not Facilities
- Evolve!
